SCIENTIFIC PRIZES
MCKINSEY & COMPANY

McKinsey & Company was one of the first consulting firms to recognize the contributions of those without traditional business training, and actively recruit candidates with advanced professional degrees. Today, nearly half our consultants have a doctorate, law, medical, or non-business master's degree. Working toward your PhD means you already have many of the skills you need to succeed here: problem-solving, intellectual curiosity, industry knowledge and technical expertise.

McKinsey & Company is the world's largest consulting firm, with more than 30,000 professionals in 133 offices in over 66 countries around the world. They help companies build solutions for sustainable performance improvement in all sectors: financial institutions, commodities, transportation, pharmaceuticals and medical devices, telecommunications, consumer goods, technology, media, etc. as well as in the social and public sector. In Belgium & Luxembourg, McKinsey works with global companies, multinationals, and emerging leaders in and outside of Belux. You can find out more via www.mckinsey.com/be

Thanks to the patronage of McKinsey & Company, the FNRS and the FWO are able to award ***2 annual scientific Prizes*** *to young researchers in recognition of their PhD thesis in the Exact or Applied Sciences, Social, Economical or Management Sciences, or Biomedical Sciences. The candidates need to demonstrate the* ***social and economical relevance or a concrete implementation of their PhD thesis.***

The complete regulations of the Scientific Prizes McKinsey & Company are available on www.frs-fnrs.be and www.fwo.be.
