1. SCHEDULE

Opening of the call on the F.R.S.-FNRS web-based application e-space for the online submission: **Tuesday 5th July 2022**.

<table>
<thead>
<tr>
<th>INSTRUMENTS</th>
<th>FRIA Call 2022</th>
<th><strong>Electronic validation deadlines</strong> on e-space</th>
</tr>

<tbody>
<tr>
<td>1st Grant</td>
<td>FRIA-B1</td>
<td>Applicant: Thursday 25th August at 2 p.m.*</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Promoter: Wednesday 31st August at 2 p.m.</td>
</tr>
<tr>
<td>2nd Grant</td>
<td>FRIA-B2</td>
<td>Rector: Friday 2nd September at 2 p.m.</td>
</tr>
</tbody>
</table>

*Please note that this is a fixed deadline and the applicant will not be able to edit, save or submit the application once this deadline has passed. Please make sure that it is submitted in advance.

- The F.R.S.-FNRS will give researchers who may be granted with a fellowship renewal (FRIA-B2) access to the electronic form via the e-space application.
- FRIA Juries will meet from Monday 10th October to Thursday 10th November 2022 on the premises of the F.R.S.-FNRS (as long as the sanitary situation allows it). Applicants to a 1st Grant are required to take an oral examination. The date of the interview, as well as its terms and conditions, will be communicated in due time. That date will not be modified by any means.
- The decision to allocate the grants will be made by the Board of Trustees of the FRIA in December. First Grant scheme starts as from 1st October 2022 while Second Grant scheme starts as from 1st January 2023.

2. APPENDICES

2.1 For each instrument, appendices must be enclosed with the application. For more information on the appendices, click on the link of the considered instrument:

3. **CHANGES COMPARED TO CALL 2021**

3.1 Creation of a second jury in the LS7 subject area (aetiology, diagnosis and treatment of disease, public health, epidemiology, pharmacy, pharmacology, clinical medicine, regenerative medicine, medical ethics)

Given the growing importance of this subject area and the large number of applicants who choose it, a second jury has been created.

The composition of FRIA juries is available [here](#).

3.2 Eligibility of the researcher-promoters MISU

The Board of Trustees of the F.R.S.-FNRS on 25<sup>th</sup> April 2022 has decided to make the researcher-promoter of a Ulysse Incentive Grant for Mobility in Scientific Research (MISU) who genuinely carries out the fellowship by the time of the starting date of the grant, i.e., by 1<sup>st</sup> October of the year of the FRIA Call concerned at the latest, eligible to be promoter of an applicant to a FRIA Grant.

4. **SPECIFIC REMARKS**

4.1 Grants Renewal

Applications for a FRIA 2<sup>nd</sup> Grant will be evaluated by the Supervisory Panel (Thesis Advisory Committee).

4.2 Ethical aspects

As from 2018, in order to reduce the Ethics Committees workload and to make the administrative procedures more flexible for applicants, the researchers concerned by ethical

---

<sup>2</sup> Where applicable, to be uploaded or mentioned by the applicant on a dedicated page at [https://e-space.frs-fnrs.be](https://e-space.frs-fnrs.be), as a follow-up of their application file after the validation deadline set for the applicant.
4.3 Fields and themes considered a priority by the Walloon government

Since FRIA grants are strictly restricted to graduates with an academic education who aim to develop their research career in the industry or agriculture, applicants whose project actually offers short, mid or long-term industrial or agronomic applications prospects, may select one or several fields and themes in the list.

The jury shall assess the application potential of the research programme and the “Industry and Agriculture” approach, and shall give its opinion accordingly.

4.4 Only one FRIA/FRESH application

Graduates in:
- Art of Building and Urban Planning
- Public Health Sciences
- Geographic Sciences
- Environmental Sciences and Management
- Psychology Sciences

are not allowed to apply for both FRIA and FRESH instruments the same year.

5. CONTENT OF A PROPOSAL

Applicants will have the choice of writing their proposal either in French or in English.

The F.R.S.-FNRS insists on strict compliance with the instructions given for each part of the proposal (scientific section relevant to the instrument selected, number of pages allowed for documents to be enclosed with the application form…) and stresses again the sovereign consideration of the juries assessing the application file.

NOTICE: no further change or modification can be made in the proposal after the validation deadline set for the applicant.

The application file contains the main sections described hereafter.

<table>
<thead>
<tr>
<th>SECTION</th>
<th>CONTENT</th>
</tr>
</thead>
<tbody>
<tr>
<td>THE RESEARCHER</td>
<td>Information that enables to verify the eligibility criteria (degrees, graduation date, institution)</td>
</tr>
<tr>
<td>Academic background</td>
<td></td>
</tr>
<tr>
<td>Awards and honours (max. 5)</td>
<td></td>
</tr>
<tr>
<td>The applicant’s list of publications (published or accepted, if any), structured according to the template</td>
<td>&gt;&gt; As stated in section 2.2, in case of publications accepted after the validation deadline set for the applicant, applicants may add them until 30th September.</td>
</tr>
<tr>
<td>Title of the Master thesis</td>
<td></td>
</tr>
<tr>
<td>THE RESEARCH PROJECT</td>
<td>Title in French and in English (max. 200 characters each, including spaces) and, Summary in French and in English (max. 2,000 characters each, including spaces)</td>
</tr>
<tr>
<td>Funded proposals are released and made public on the F.R.S.-FNRS website</td>
<td>&gt;&gt; The applicant chooses the subject area they wish their application to be assessed in as well as the jury within this subject area.</td>
</tr>
<tr>
<td>Selection of the subject area and of the jury.</td>
<td>&gt;&gt; The applicant chooses the subject area they wish their application to be assessed in as well as the jury within this subject area.</td>
</tr>
<tr>
<td>Selection of 2 to 6 descriptor fields in order of relevance, they can be completed by some unrestricted keywords.</td>
<td></td>
</tr>
</tbody>
</table>
If applicants select only one descriptor field corresponding to the subject area selected, they shall justify their choice in the application form.

It is mandatory to use the template: FRIA-B1 (FR / EN) - FRIA-B2 (FR / EN).

The description of the project (max. 4 pages) is divided in 4 parts:
1. Goals of the research
2. State of the art
3. Research project
4. Work plan

Graphs and tables (max. 2 pages) are authorised in addition to the 4 pages.
A reference bibliography (max. 1 page) should be included and listed by order of appearance in the text.

Summary of the 1st year of Ph.D. - For 1st Grant-2nd year applicants only.

Applicants to a FRIA grant may present the industrial or agronomic approach and prospects related to their project in the application file (see point 4.3).

THE WORK ENVIRONMENT

Facts allowing to assess whether the environment (the intellectual means and/or equipment available to the applicant) is consistent with the aims of the research project.

Data can vary depending on the nature of the project and the scientific field.

THE REFERENCE PERSONS

Contact details (first name, surname, email) of:
- 2 reference persons (different from the promoter) member of the academic staff of a scientific institution,
- 2 reference persons from the industry and/or agriculture sectors.

Applicants shall contact the reference persons prior to mentioning their contact details in the application form to make sure that they are willing to provide a reference letter as part of their application.

After submission of the application file, the F.R.S.-FNRS will contact the reference persons referred in the application form and a reminder will be sent to each of them in due course. No information will be communicated to the applicant on the receipt of the letters to ensure confidentiality.

6. SELECTION PROCEDURE, JURIES

6.1 Composition of juries

The FRIA has adopted 19 subject areas corresponding to the 19 LS and PE panels of the ERC (European Research Council). These subject areas are identified in a list of ERC descriptor fields complemented by FNRS keywords reflecting certain specificities of research in the French-speaking Community of Belgium (CFB).

The list including the 19 subject areas is the following:

- **LS1**: molecular biology, biochemistry, biophysics, structural biology, biochemistry of signal transduction
- **LS2**: genetics, population genetics, molecular genetics, genomics, transcriptomics, proteomics, metabolomics, bioinformatics, computational biology, biostatistics, biological modelling and simulation, systems biology, genetic epidemiology
- **LS3**: cell biology, cell physiology, signal transduction, organogenesis, developmental genetics, pattern formation in plants and animals
- **LS4**: organ physiology, pathophysiology, endocrinology, metabolism, ageing, regeneration, tumorigenesis, cardiovascular disease, metabolic syndrome
LS5: neurobiology, neuroanatomy, neurophysiology, neurochemistry, neuropharmacology, neuroimaging, systems neuroscience, neurological disorders, psychiatry
LS6: immunobiology, aetiology of immune disorders, microbiology, virology, parasitology, global and other infectious diseases, population dynamics of infectious diseases, veterinary medicine
LS7: aetiology, diagnosis and treatment of disease, public health, epidemiology, pharmacy, pharmacology, clinical medicine, regenerative medicine, medical ethics
LS8: evolution, ecology, animal behaviour, population biology, biodiversity, biogeography, marine biology, eco-toxicology, prokaryotic biology
LS9: agricultural, animal, fishery, forestry and food sciences; biotechnology, chemical biology, genetic engineering, synthetic biology, industrial biosciences; environmental biotechnology and remediation
PE1: all areas of mathematics, pure and applied, plus mathematical foundations of computer science, mathematical physics and statistics
PE2: particle, nuclear, plasma, atomic, molecular, gas, and optical physics
PE3: structure, electronic properties, fluids, nanosciences
PE4: analytical chemistry, chemical theory, physical chemistry/chemical physics
PE5: materials synthesis, structure-properties relations, functional and advanced materials, molecular architecture, organic chemistry ³
PE6: informatics and information systems, computer science, scientific computing, intelligent systems
PE7: electronic, communication, optical and systems engineering
PE8: product design, process design and control, construction methods, civil engineering, energy systems, material engineering
PE9: astro-physics / chemistry / biology; solar system, stellar astronomy, galactic and extra-galactic; planetary systems, cosmology; space science, instrumentation
PE10: physical geography, geology, geophysics, meteorology, oceanography, climatology, ecology, global environmental change, biogeochemical cycles, natural resources management

Some juries may be built around the same subject area, depending on the number of applicants.

Each jury is made up of 1 non-academic member from a research center or an expert from the industry sector, plus 6 or 8 members from CFB universities, respecting the balance between universities:
→ 2 UCLouvain, 2 ULB, 2 ULiège
→ 1 UMons and/or 1 UNamur, depending on the field concerned

The composition of FRIA juries is available here. The composition is subject to modifications depending on the number of applicants and the conflicts of interest (COI) that might be reported by juries’ members. The composition also depends on the availability of members, any withdrawal or replacement, and may vary accordingly.

6.2 Validation of the subject area and distribution of the files between the different juries of a subject area

The choice of subject area by the applicant will be accepted or denied by the Presidents of juries, as long as they don’t come from the same university as the applicant (in which case a Vice-president will be in charge of this procedure).

When there are more than one jury in the subject area of the jury chosen by the applicant, the FRIA reserves the right to transfer the applicant to another jury, taking into account the number of applicants and the management of potential conflicts of interest. If necessary, the FRIA may transfer the applicant to another jury when their (co-)promoter is a member of the jury.

³ Since the 2019 FRIA call, given that correspondence between PE3 and PE5 subject areas, PE5-jury 2 has been broadened, henceforth including members whose descriptor fields also cover PE3 subject area.
6.3 How juries operate

Juries shall devote 30 minutes at most to each applicant. The oral presentation of the applicant may not exceed 10 minutes. Following the interview and the departure of the applicant the jury shall debate and grade them.

7. EVALUATION CRITERIA - EVALUATION REPORT

The evaluation criteria that will be taken into account are the following:

<table>
<thead>
<tr>
<th>CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Quality of the research project:</td>
</tr>
<tr>
<td>Feasibility, originality, host laboratory, work plan, and activities report (applicable only for applicants to a 1st Grant 2nd Year)</td>
</tr>
<tr>
<td>Skills of the applicant with regard to their speciality (CV)</td>
</tr>
<tr>
<td>Presentation and answers given to questions about the project</td>
</tr>
<tr>
<td>Scientific knowledge in general</td>
</tr>
</tbody>
</table>

For applicants to a FRIA 1st Grant, juries will assess their capability to conduct their doctoral research in 4 years. Depending on the progress of the research work, juries may decide to recommend applicants whether for a 1st Grant 1st year or 1st Grant 2nd year.

To respect the European Charter for the Researcher, interviewed applicants will receive an evaluation report following the meeting of the Board of Trustees of the FRIA in December.
