## CHAPITRE I : GENERAL PROVISIONS

### **Article 1**

These rules and regulations define the terms for the allocation, use and management of granted funding within the framework of the instrument “Thematic Research Project (PDR-THEMA)” of the Fonds de la Recherche Scientifique – FNRS (F.R.S.-FNRS).

### **I-A : Objective**

#### **Article 2**

The objective of the PDR-THEMA instrument is to support research projects within the framework of thematic calls organised by the F.R.S.-FNRS.

### **I-B : Scope**

#### **Article 3**

The thematic scope is defined in the call page.

### **I-C : Framework**

#### **Article 4**

The research project is conducted by a promoter within a university of the French Community of Belgium (*Communauté française de Belgique - CFB*).

The promoter may conduct the project individually or in collaboration with one or more co-promoters within one or more institutions listed in [Annex 1](#).

A co-promoter may belong to the same university as the promoter.

#### **Article 5**

The promoter is responsible for submitting an application to the F.R.S.-FNRS, presenting the project proposal and detailing the budget required for its implementation.

If funding is granted, the promoter assumes scientific and administrative responsibility for the project vis-à-vis the F.R.S.-FNRS. In this capacity, the promoter ensures in particular the proper execution of the funded project and manages its administrative follow-up with the F.R.S.-FNRS.

#### **Article 6**

A co-promoter contributes to the preparation of the application.

If funding is granted, a co-promoter contributes to the implementation of the project by carrying out the tasks assigned to them and assists in the administrative follow-up of the project within their institution, under the coordination of the promoter.

#### **Article 7**

The institution is responsible for the administrative validation of applications submitted by applicants affiliated with it.

If funding is granted, the institution is the recipient of the subsidies and assumes their financial and accounting management for the implementation of the project.

The institution is also responsible for the management of personnel, equipment and intellectual property rights arising from the funded project.

#### **Article 8**

The F.R.S.-FNRS distinguishes 3 types of projects based on the roles and institutions involved:

- Single-promoter : project conducted by a promoter within a university, with no co-promoter
- Single-university : project conducted by a promoter in collaboration exclusively with one or more co-promoters within the same university
- Multi-university : project conducted by a promoter in collaboration with at least one co-promoter within an institution different from that of the promoter

Only the institutions listed in [Annex 1](#) shall be taken into account to determine the type of project.

### **Article 9**

The research project may include the collaboration of the university clinic linked with the university involved in the project (see list of university clinics and services in [Annex 2](#)).

This collaboration must imperatively be planned from the project design stage and detailed in the application form by completing the fields provided for this purpose.

When included as a partner in the project, the university clinic may have its services funded under the same conditions as those applicable to the university to which it is linked.

A university clinic that has not been declared as a partner at the time of application submission may not be added or recognised as such at a later stage.

### **Article 10**

The promoter includes in the application a list of their collaborators.

The list of collaborators serves to describe the collaboration network.

### **Article 11**

The application allows for the recognition of the contribution of a project contributor.

A project contributor is a researcher who has significantly contributed to the drafting of the application and/or who has expertise relevant to the execution of the project.

A project contributor may not be assigned tasks, nor request budget.

## **CHAPITRE II : APPLICATION**

### **II-A : Eligibility criteria**

#### **Article 12**

To be eligible as a promoter, the applicant must meet one of the following conditions within a university of the CFB listed in [Annex 1](#) no later than the deadline for validation by the rectoral authorities:

- be a Research Associate (*Chercheuse qualifiée ou Chercheur qualifié* - CQ), Senior Research Associate (*Maître de recherches* - MR) or Research Director (*Directrice ou Directeur de recherches* - DR) of the F.R.S.-FNRS and have effectively taken up that position;
- genuinely carry out a Ulysse Incentive Grant for Mobility in Scientific Research (*Mandat d'impulsion scientifique* - MISU);
- genuinely carry out a FED-tWIN mandate;
- hold an academic or scientific appointment and meet the following cumulative conditions:
  - be appointed on a permanent or probationary basis;
  - this appointment must have been definitively and irrevocably approved by the competent authority of the institution;
  - have effectively taken up that appointment.

#### Specific provisions relating to the FED-tWIN mandate

If the FED-tWIN mandate expires after the deadline for validation by the rectoral authorities and before the end of the funding period if granted, the submission of an application is conditional on designation of a replacement able to ensure the continuity of the research project as promoter in the event that the mandate holder no longer meets the eligibility criteria upon the end of their mandate.

If this conditions is not met, the application may be deemed inadmissible.

#### Specific provisions relating to retirement and emeritus status

An applicant who reaches retirement or emeritus status before the deadline for validation by the rectoral authorities is ineligible.

If the applicant reaches retirement or emeritus status after the deadline for validation by the rectoral authorities and before the end of the funding period if granted, the submission of an application is conditional upon one of the following conditions :

- prior agreement from the competent authority of the institution confirming that the person will be able to continue the funded research project until the end of the funding period.
- the designation of a replacement able to ensure the continuity of the research project as promoter upon reaching retirement or emeritus status.

If one of these conditions is not met, the application may be deemed inadmissible.

#### **Article 13**

To be eligible as a co-promoter, an applicant must meet the same eligibility conditions as those applicable to a promoter within an eligible institution listed in [Annex 1](#).

#### **Article 14**

Research logisticians of rank A, as defined by the *Arrêté royal du 31 octobre 1953 fixant le statut des agrégés, des répétiteurs et des membres du personnel scientifique des universités de l'État*, may not exercise the role of promoter.

They may, however, exercise the role of co-promoter provided that they hold an academic doctoral degree.

#### **Article 15**

The project contributor is not subject to any eligibility criteria.

## **II-B : Cumulative rules**

#### **Article 16**

The number of applications that may be submitted as promoter or co-promoter is limited to one per call.

#### **Article 17**

The submitted project may not be identical to a PDR-THEMA project currently under funding or to a project previously funded through PDR-THEMA.

#### **Article 18**

In the case of recurrent PDR-THEMA calls on the same theme, awardees are not authorized to apply to the following edition if it closes less than 18 months after the previous one. In this case, the closing date corresponds to the deadline for validation by the promoter on the [e-space](#) platform.

## **II-C : Submission modalities**

#### **Article 19**

The call for projects is published on the F.R.S.-FNRS website.

The call page specifies the opening and closing dates of the call.

Applications must be submitted during the opening period.

Any submission outside this period is inadmissible.

#### **Article 20**

Applications must be submitted online via the [e-space](#) platform.

Any application submitted by any other means is inadmissible.

#### **Article 21**

The application must be drafted in French or English.

If an application in the SVS (Life and Health Sciences), SEN (Exact and Natural Sciences) or in the fields covered by Human and Social Sciences-2 (SHS-2)<sup>1</sup> is drafted in French, the F.R.S.-FNRS may request an English translation from the promoter for evaluation purposes. This translation must be provided to the F.R.S.-FNRS within 5 working days.

#### **Article 22**

The promoter completes the online form and uploads the required supporting documents, in accordance with the provided instructions.

They are solely responsible for the content of the application submitted to the F.R.S.-FNRS, including the accuracy and compliance of the information provided.

#### **Article 23**

Any submitted application is subject to successive electronic validations on the dates communicated in the call page:

1. Validation by the promoter: this constitutes confirmation that the application is complete.

Any application not validated by the promoter within the required deadline is cancelled.

No modification or correction to the application is accepted after the validation deadline and time set for the promoter.

Once validated by the promoter, the application is transmitted to the rectoral authorities of the host institution for validation.

2. Validation by the co-promoters, where applicable: this serves as an electronic signature.

Once validated by a co-promoter, the application is transmitted to the rectoral authorities of their host institution for validation.

3. Validation by the rectoral authorities (or cellule de recherche) of the involved host institutions: these authorities accept or reject the application in accordance with the eligibility criteria, and may also apply other internal institutional criteria.

The deadline for validation by the rectoral authorities definitively marks the closure of the call for projects.

## **II-D : Administrative control of the F.R.S.-FNRS**

#### **Article 24**

---

<sup>1</sup>The document describing the [F.R.S.-FNRS descriptor fields](#) lists the topics covered in SVS, SEN, and SHS-2.

The F.R.S.-FNRS reserves the right to declare ineligible any application that is incomplete or does not comply with the provisions set out below:

- eligibility criteria;
- compliance with the provided guidelines;
- presence of all required elements;
- eligibility of the cost categories.

The F.R.S.-FNRS may declare an application ineligible at any stage of the process, right up until the funding decision is made.

The promoter concerned will receive a letter setting out the reasons for the ineligibility of their application.

## **II-E : Scientific evaluation**

### **Article 25**

Applications are evaluated by a thematic Scientific Commission or one from the F.R.S.-FNRS according to the thematic of the call.

This evaluation may be preceded by individual remote expert evaluation, depending on the evaluation's needs.

The exact modalities are defined in the call page.

All details regarding the ex-ante evaluation are set out in the evaluation guide.

### **Article 26**

Remote experts draft reasoned opinions on the applications submitted to them based on the evaluation criteria.

These opinions are forwarded to the members of the Scientific Commission.

### **Article 27**

Members of the Scientific Commission carry out the evaluation and ranking of the applications submitted to them based on the evaluation criteria.

They also assess the adequacy between the requested budget and the research proposal, and may reduce the requested budget by a maximum of 15% based on a scientific justification. If the adequacy between the research proposal and the requested budget is not justified and appears to require a reduction of more than 15%, the application cannot be considered fundable.

The Scientific Commission has sole authority over the evaluation of the applications submitted to it.

### **Article 28**

The criteria taken into account in the evaluation of applications are as follows:

<b>Criteria</b>	<b>Weight</b>
Qualities of the profile <ul style="list-style-type: none"> <li>• Academic CV</li> <li>• International visibility</li> <li>• Ability to carry out the proposed project</li> </ul>	40%
Qualities of the research project: <ul style="list-style-type: none"> <li>• Innovative nature of hypotheses and approach</li> <li>• Conceptual robustness</li> </ul>	40%

• Feasibility (including adequacy of the working environment)	
Potential impact in the targeted field	20%

### **Article 29**

Open science practices may constitute element potentially adding value to the application file (and more particularly of the CV), without constituting a mandatory evaluation criterion.

## **II-F : Funding decision**

### **Article 30**

The F.R.S.-FNRS Board of Trustees awards the funding based on the ranking established by the members of the Scientific Commission, within the limits of the available budgets. It decides on the granting or rejection of applications and, where applicable, on the amounts awarded.

### **Article 31**

The decisions of the F.R.S.-FNRS Board of Trustees are communicated at the conclusion of the meeting following the evaluation of the applications.

### **Article 32**

Within 15 days following the communication of the results, the F.R.S.-FNRS administration sends the final evaluation report to the promoter.

## **CHAPITRE III : FUNDING**

### **III-A : Characteristics**

#### **Article 33**

The funding is for a period of 2 or 4 years.

#### **Article 34**

The funding instrument allows you to request a minimum and maximum total budget depending on the duration and type of project:

	<b>Single-promoter</b>	<b>Single-university</b>	<b>Multi-university</b>
<b>2 years</b>	€60,000 – €170,000	€60,000 – €200,000	€60,000 – €245,000
<b>4 years</b>	€120,000 – €340,000	€120,000 – €400,000	€120,000 – €485,000

#### **Article 35**

The following cost categories are eligible :

- Staff
- Operating costs
- Equipment

#### **Article 36**

The following staff positions are eligible :

<b>Categories</b>	<b>Working arrangement</b>	
	<b>Part-time</b>	<b>Full-time</b>
Doctoral researcher – grant	N/A	x
Doctoral researcher – salary	x	x

Postdoctoral researcher	x	x
Non-doctoral researcher – salary	x	x
Technician – salary	x	x

N/A = non applicable

The identity of the staff is not required when submitting the application.

The minimum employment duration for the requested staff position must be at least one month.

For all staff position included in the application, the applicant contacts the relevant department of their host institution to determine the staff's status (mobility situation, grant, salary, etc.) and working arrangement in order to establish a cost estimate based on their research seniority.

The staff is employed by the host institution.

### **Article 37**

A doctoral researcher is a researcher in training pursuing third-cycle studies leading to the award of an academic doctoral degree.

A doctoral researcher holding a doctoral grant may only be employed on a full-time basis.

On the date of employment by the host institution, the doctoral researcher must be enrolled in a doctoral programme in compliance with the access conditions set out in the *Décret du 7 novembre 2013 de la CFB définissant le paysage de l'enseignement supérieur et l'organisation académique des études*.

### **Article 38**

A postdoctoral researcher is a researcher holding an academic doctoral degree and pursuing postdoctoral-level research.

On the date of employment by the host institution, the postdoctoral researcher must hold an academic doctoral degree obtained after a successful doctoral defence.

### **Article 39**

Holders of an academic master's degree (or equivalent) are eligible under the category of non-doctoral researchers.

Under no circumstances may they carry out personal research aimed at obtaining a doctoral degree during the hours worked within the framework of this position.

### **Article 40**

Holders of an academic master's degree (or equivalent) or of a doctoral degree obtained after a successful defence are not eligible under the category of technicians.

### **Article 41**

No allowance or remuneration may be granted to the promoter or to the co-promoter within the framework of this funding to cover, compensate, or supplement their own remuneration, in any form whatsoever.

Consequently, any person funded under a staff position may not exercise the role of promoter or co-promoter.

### **Article 42**

Subcontracting is eligible under operating costs and is limited to 20% of the total budget requested.

### **Article 43**

The F.R.S.-FNRS policy regarding eligibility of costs is set out in the [Practical guide on costs](#).

The F.R.S.-FNRS reimburses only eligible costs in accordance with the provisions set out in this guide.

## **III-B : Granting and terms of use**

### **Article 44**

The granted funding is the subject of a research agreement concluded between the following parties:

- **the F.R.S.-FNRS**, as the funding body;
- **the promoter**, as the scientific and administrative responsible of the project;
- **the host institution(s)** of the promoter and, where applicable, of the co-promoters, as recipients of the subsidies, responsible for their financial and accounting management, and host sites of the funded project.

The research agreement specifies in particular the rights and obligations of the parties, as well as provisions relating to the management of staff, equipment and intellectual property arising from the project.

Any amendment to the provisions of the agreement shall be the subject of an addendum drawn up in accordance with the same procedure as the agreement.

The agreement provides for unilateral termination clauses which are accompanied by notice period clauses.

### **Article 45**

Funding is granted in the form of reimbursement of expenses incurred by the institution for the implementation of the funded project.

### **Article 46**

The financial commitment of the F.R.S.-FNRS is limited to the total amount mentioned in the research agreement.

### **Article 47**

Transfers between staff, operating and equipment cost categories, as well as changes within a single category, are authorised.

Budgetary modifications are authorised within the budget granted to an institution. Transfers between different institutions are not authorised.

Any budgetary modification must be notified on the [e-space](#) platform via the module provided for this purpose.

### **Article 48**

The subsidies may be used during the duration of the agreement extended by a period of 12 month.

### **Article 49**

Any unused sums at the end of the period of use shall revert to the F.R.S.-FNRS.

## **III-C : Accounting management**

### **Article 50**

The F.R.S.-FNRS reimburses only eligible expenses upon presentation of documentary evidence and within the limit of the amount awarded to the institution.

### **Article 51**

The institution is responsible for the financial and accounting management of the expenses incurred in the framework of the funded project.

In this capacity, it ensures the eligibility of expenses, within the meaning of the present rules and regulations, and is responsible for the establishing, retaining and transmission of the documentary evidence necessary for reimbursement.

Where the project involves a university clinic, the university to which it is linked is responsible for the financial and accounting management of expenses incurred by the clinic and acts as its sole intermediary with the F.R.S.-FNRS for their reimbursement.

#### **Article 52**

The institution's financial department is invited to transmit the documentary evidence to the F.R.S.-FNRS as early as possible.

For staff costs relating to a given calendar year, documentary evidence must be transmitted before 1<sup>st</sup> March of the following year.

For operating costs, the deadline for transmission of documentary evidence is set before 1<sup>st</sup> March directly following the end date of the use period of the relevant subsidies.

For equipment costs, the deadline for transmission of documentary evidence is set before 1<sup>st</sup> March directly following the end date of the use period of the relevant subsidies.

#### **Article 53**

Documentary evidence must mention the reference number of the research agreement governing the funding under which the financial department requests reimbursement.

Any documentary evidence that does not bear the appropriate reference is inadmissible and will not be reimbursed.

## **CHAPITRE IV : RIGHTS AND OBLIGATIONS**

### **IV-A : Host institution**

#### **Article 54**

The host institution is responsible for the financial and accounting management of the granted subsidies in accordance with the provisions of these rules and regulations, and assumes all financial responsibility arising therefrom.

#### **Article 55**

Staff is employed by the host institution in accordance with the salary scales and regulations in force within that institution.

It is the institution's responsibility to ensure that the qualification level of the employed staff is appropriately reflected in their remuneration in order to avoid any situation in which qualifications are exploited without adequate salary compensation.

The institution determines the status of the staff to be employed and bears sole responsibility for this decision. It expressly undertakes to bear all consequences arising from any incorrect application of social and tax legislation with regard to the treatment of the sums paid to employed staff and from any provision it may have failed to apply for the benefit of such staff. The F.R.S.-FNRS cannot be held liable to intervene after the fact in the payment of any sum owed as a result of an incorrect determination of status or incorrect treatment of amounts paid to the employed staff.

When employing staff, the institution is required to ensure that the eligibility criteria applicable to each staff category are met.

The F.R.S.-FNRS reserves the right to verify compliance with these provisions with the institution, and to suspend or cancel the funding in the event of proven non-compliance.

#### **Article 56**

Any equipment acquired using F.R.S.-FNRS subsidies becomes the property of the host institution.

The acquisition of any equipment must be carried out in compliance with the requirements defined in this regard by the relevant department of the host institution.

However, the institution undertakes to make the equipment in question available to the researchers involved for as long as necessary for the continuation of the research that motivated its acquisition. It also undertakes not to dispose of or lend this equipment without the prior written approval of the F.R.S.-FNRS.

In the event that the equipment could only be acquired with the contribution of additional funding, the F.R.S.-FNRS Board of Trustees shall decide on the issue of ownership together with the authorities concerned.

In the event of a dispute on issues of ownership, the F.R.S.-FNRS recommends that the parties involved ensure the continuity of the research activities of the persons affected.

#### **Article 57**

Intellectual property rights arising from the results of a funded research project belong to the host institution in which the project was carried out, in compliance with any internal regulations adopted on the matter.

If several institutions are involved in the research, the F.R.S.-FNRS recommends that all parties enter into a collaboration agreement at the start of the research, setting out the terms and conditions applicable to publications, confidentiality and the protection and exploitation of intellectual property rights resulting from a funded research project.

## **IV-B : Promoter**

#### **Article 58**

The promoter undertakes to deploy all means necessary for the proper conduct of the funded project.

Funds are awarded exclusively for the implementation of the research project approved by the F.R.S.-FNRS. The promoter is required to allocate them solely for this purpose.

The work plan may, where appropriate, be subject to adjustments during implementation, provided that these are justified by the needs of the project. Any fundamental change to the research project during its implementation must receive the prior written approval of the F.R.S.-FNRS.

Any proven failure to comply with these obligations may give rise to measures of suspension or cancellation of the funding by the F.R.S.-FNRS.

#### **Article 59**

The promoter is required to notify any budgetary change within the initially planned expenditures for the funded project on the [e-space](#) platform via the module provided for this purpose.

Any failure to comply with this notification procedure may affect accounting follow-up by delaying or preventing reimbursement by the F.R.S.-FNRS of the expenses concerned.

#### **Article 60**

The promoter must comply with the discipline imposed by the academic authority of the host institution in which they work and must respect its regulations; they are also required, vis-à-vis the F.R.S.-FNRS, to comply with the regulations concerning ownership, protection, and valorisation of the results of research carried out within their institution.

#### **Article 61**

Any funded research project must comply with the applicable legal provisions relating to ethics. This obligation applies to all stakeholders involved in the project.

Any proven failure to comply with these obligations may give rise, after examination by the Board of Trustees, to measures of suspension or cancellation of the funding by the F.R.S.-FNRS.

#### **Article 62**

In accordance with the regulations relating to the application of the open access policy to scientific publications resulting from research programmes supported by the F.R.S.-FNRS, any scientific article produced partially or entirely through the present financial support must be deposited in the digital archive of the supervisor's institution after acceptance of the article by a publisher.

The F.R.S.-FNRS encourages the deposit of any other type of scientific publication produced partially or entirely through the present financial support in the institutional repository.

The promoter is required to reference the F.R.S.-FNRS as the funding body in the institutional repository in the following manner:

“Fonds de la Recherche Scientifique – FNRS”

Any scientific publication or communication produced partially or entirely through the present financial support must mention the source of this funding in the following manner:

- In French: “Ce travail a été réalisé avec le soutien financier du Fonds de la Recherche Scientifique – FNRS via le financement [acronym of the instrument] [agreement or funding letter reference].”
- In English: “This work was supported by the Fonds de la Recherche Scientifique – FNRS under the funding [acronym of the instrument] [agreement or funding letter reference].”

Where applicable, any publication, poster, or presentation produced partially or entirely through the present financial support must include the F.R.S.-FNRS logo.

#### **Article 63**

The promoter undertakes to submit a data management plan to the F.R.S.-FNRS by following the instructions and format set out [on this page](#).

This data management plan must be uploaded on the [e-space](#) platform.

Any proven failure to comply with this obligation may be reported to the F.R.S.-FNRS Board of Trustees, which will take the appropriate measures.

#### **Article 64**

The F.R.S.-FNRS collects ex-post quantitative indicators (number of publications, patents, theses, dissertations, etc.) as well as the list of publications related to the awarded funding.

The promoter communicates these data to the F.R.S.-FNRS via the [e-space](#) platform throughout the entire duration of the funding.

Any proven failure to comply with this obligation may be reported to the F.R.S.-FNRS Board of Trustees, which will take the appropriate measures.
